

# VULNERABILITY: POVERTY

Vulnerability is in this exercise represented by Poverty Incidence. Even though it is recognized that INFORM- framework and the general contains many more vulnerability-indicators, the reality of the matter is that at this detailed level no other data is available. However, it must also be recognized that poverty incidence is potentially the most important indicator of vulnerability, most closely relating to vulnerability itself.

Poverty is retrieved from WorldPop (<http://www.worldpop.org.uk/data/summary/?doi=10.5258/SOTON/WP00157>) and is measured as the percentage of the population living below \$1.25/day.
